ABOUT ME

I'm all about building awesome things—whether it's perfecting the user experience or getting into the details of how everything works behind the scenes. When I'm working on a project, I dive in fully, always aiming to make it as great as possible for the people using it.

PROFESSIONAL EXPERIENCE

Lead Developer and Coordinator (Volunteering)   **Nov 2022 - Mar 2023**
- Developed a professional project for a university assignment, creating a travel management platform.
- The project was completed in approximately 3-4 months, during which I also learned new technologies included in the project stack.
- The project used Django with Python and employed MySQL as the local database.

EDUCATION

UNIVERSIDAD TECNOLÓGICA NACIONAL DE LA PLATA
Information Systems Engineering   **2023**

LANGUAGES

Spanish   **Native**
English (British and American)   **Fluid**

PROJECTS

Naftas - Fuel Price Tracker in Your Hand (https://naftas.com.ar)
Naftas is a fuel price tracker that I created in mid-2024. It offers a wide range of features, such as viewing updated prices, saving quotes, sharing quotes, weekly discounts, upcoming price hikes, and more. The platform is powered by various datasets, including data from the Ministry of Energy, to provide real-time price updates through the API.

Delta - Subscription System for SaaS
Delta is an app designed for SaaS businesses that manage subscription-based revenue, simplifying payment processing. It supports traditional payments, cryptocurrencies, and other methods that businesses can enable.
